

# FOAM PRIMARY LINERS

Three-layer coex with solid skins and a foamed core

Tri-Seal foam primary liners are ideal for continuous thread or child-resistant closures where resealability is important. These are also the liners of choice for minimizing the chance of leaks in dispensing closure applications, such as trigger sprayers.

## Overview

Foam primary liners are the workhorse choice for a broad range of products including over-the-counter pharmaceuticals, chemicals (household, lawn, industrial and agriculture), alcohol, distilled spirits and cosmetics (beauty care, scrubs, lotions).

Here are just some of the features and benefits:

- Manufacturer of the industry standard F-217 primary foam liner
- Wide range of foam densities to meet performance objectives
- Polyolefin foam options: LDPE, HDPE, LDPE/EVA, PP
- Compatible with PET, PE, PP, PVC, PS, glass, aluminum and steel containers
- Thickness ranging from 20 to 125 mils
- Three-layer coex construction with solid skins and a foamed core offers smoother contact surfaces for improved sealing. Particularly important for hard to contain products (lubricants, oils, surfactants).
- Can be printed with standard or custom messaging
- Modest O<sub>2</sub> and moisture barrier
- Leak prevention
- Proven, market-tested technology

If you are looking for a closure liner that offers you a marketing advantage, please contact us.
