ALUFLEXPACK AG

short presentation of the Aluflexpack Group

January 2023

ALUFLEXPACK AG (Aluflexpack Group)

The Aluflexpack Group is an international manufacturer of flexible packaging with over 40 years of experience.

The Aluflexpack Group is an independent and competitive group successfully supplying bespoke packaging to leading European manufacturers and global brands.

Since November 2012 Aluflexpack Group is a member of Montana Tech Components AG Group which is aiming at strengthening and further utilising its aluminium expertise and its position as one on of the leading European players in the packaging industry.

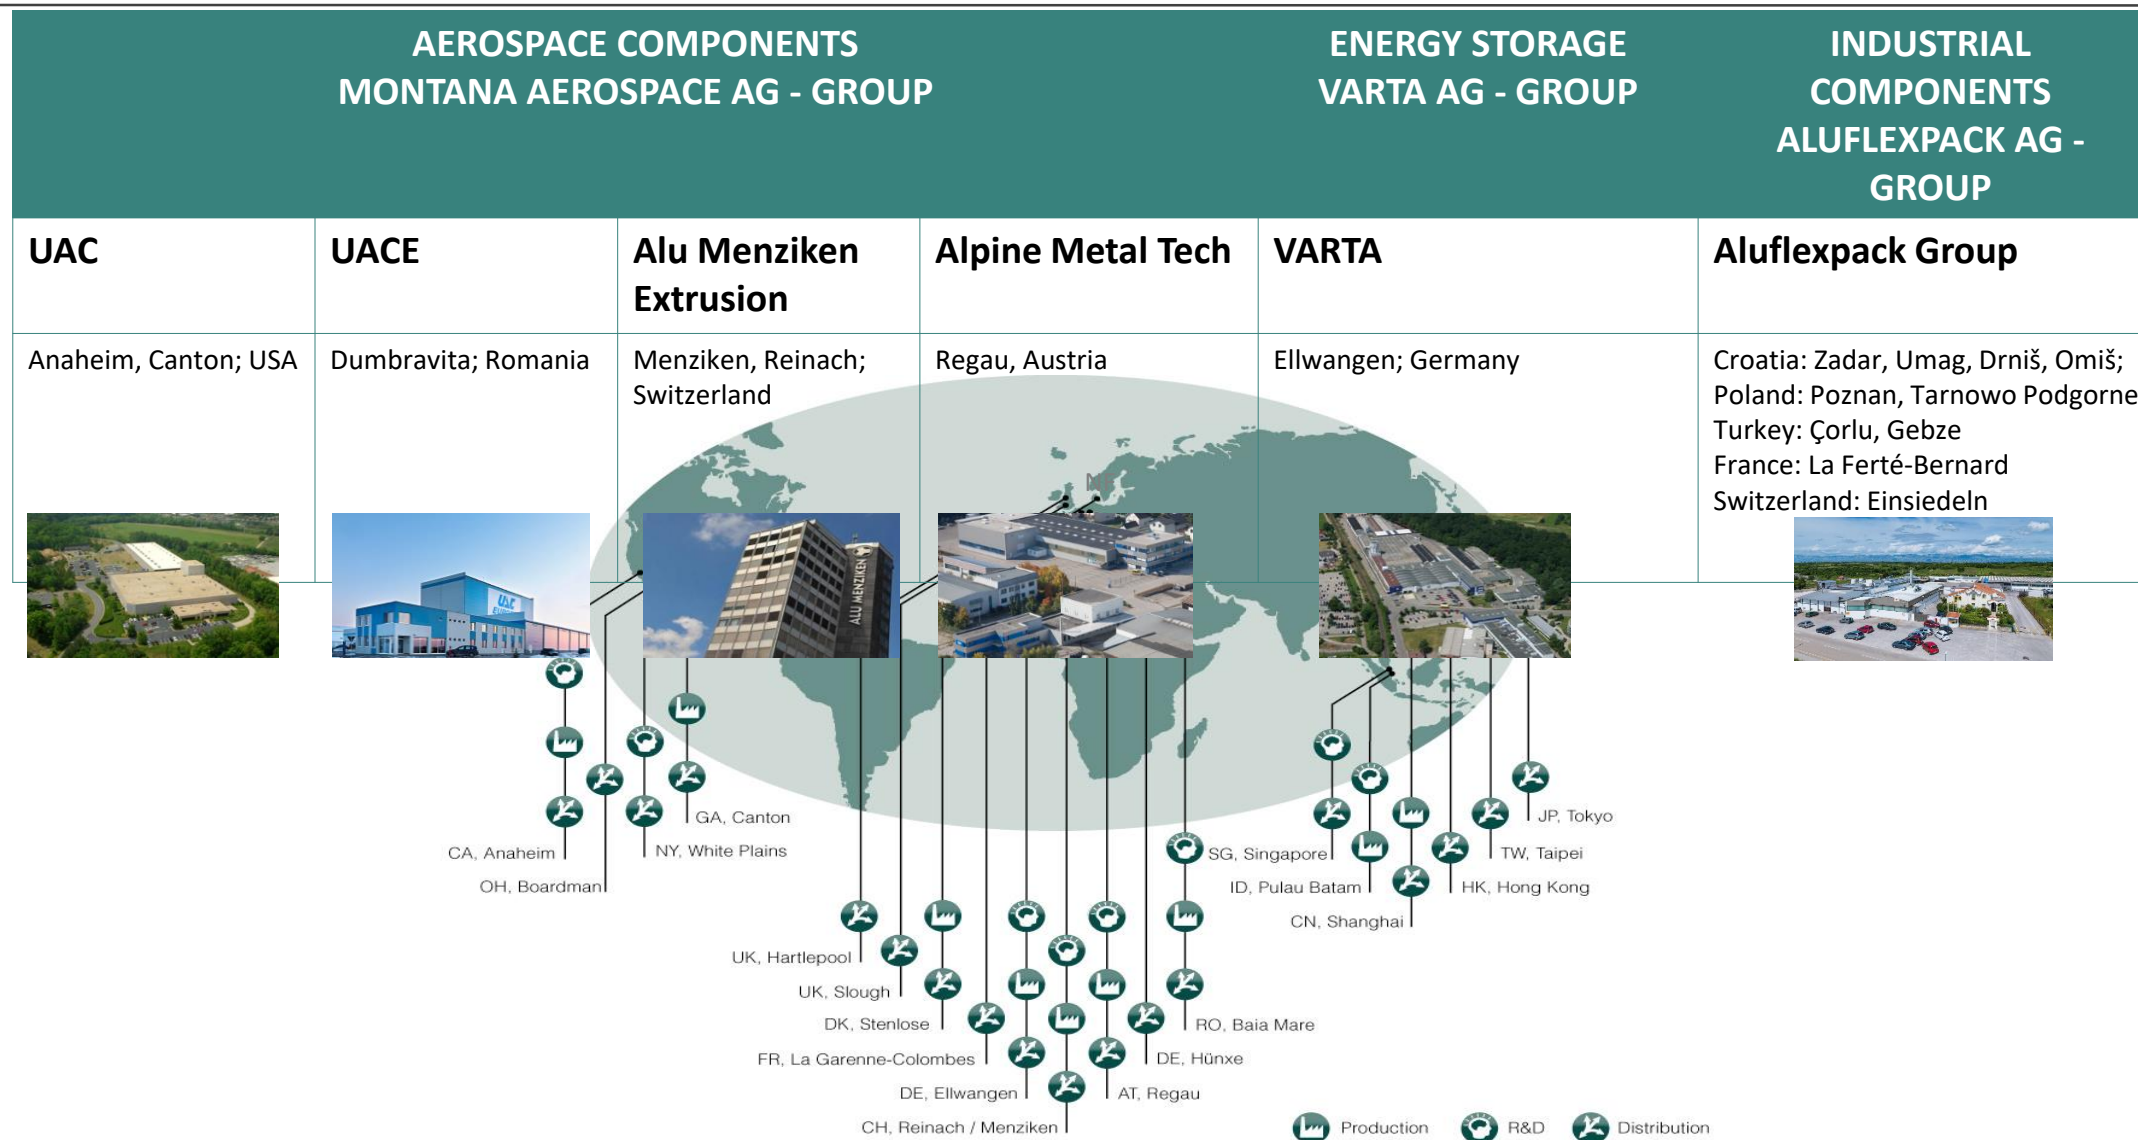

Since June 28th 2019 Aluflexpack Group is a publicly traded company on the SIX Swiss Exchange. Montana Tech Components Group (MTC) is still the majority shareholder assuring continuity and stability in the strategy and development.

The Company used the proceeds for investments aiming at increasing efficiency and existing production capacities as well as the internationalization of its manufacturing footprint.

NEW MEMBER SINCE 2022!

Production plants and logistics hub

Aluflexpack Novi Driň

Specialized in rotogravure printing, lacquering, laminating and coextrusion – production of semifinished and final products for selected industries:

Aluflexpack Novi Umag

Specialized in rotogravure printing and laminating, wax coating and laminating, and pouch forming; production of final products for selected industries:

Aluflexpack Novi Zadar

Specialized in converting aluminium using conventional and UV-flexo printing and lid punching; production of final products for selected industries:

Aluflexpack Polska

Logistics hub for all product types and industries:

Arimpeks Türkiye

Specialized in converting aluminium and plastic materials using rotogravure, flexo and digital printing; production of final products for selected industries:

Eliopack France

Specialized in converting aluminium and plastic materials using rotogravure, conventional and UV-flexo printing and laminating; production of final products for selected industries:

Omial Novi Omiš

Specialized in retortable foils – lamination, lacquering, oiling and alu-container forming; production of final products for selected industries:

Process Point Service

Specialized in aluminium container forming – deep-drawing and punching; production of final products for selected industries:

Top-System Poland

Converting aluminium and plastic materials into aluminium and PET lids, IML labels and lidding foil in reels, using UV-flexo printing for production of final products in selected industries:

Teko Türkiye

**NEW
MEMBER
SINCE
2022!**

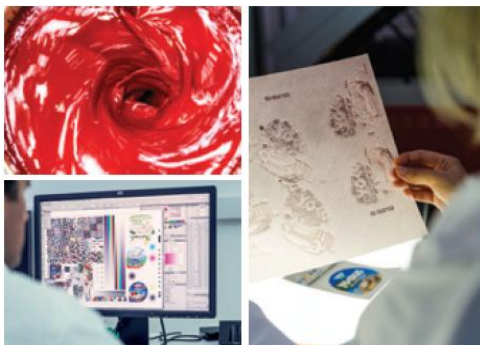

Specialized in coextrusion, laminating and lacquering using rotogravure and flexo printing, lid punching and metal caps forming; production of final products for selected industries:

Value chain

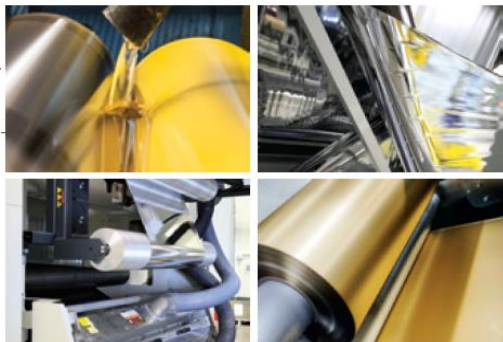

1. SERVICES

From an **idea** to the final product: we provide not only materials research, comprehensive product development, design services and pre-press work, but also efficient and appropriate business models to assure agility and the best support for day-to-day operations.

2. CONVERTING

We lacquer, extrude and laminate functional layers on base materials.

3. PRINTING

Our **state-of-the-art** printing machines allow excellent print in roto, flexo and digital on aluminium, plastics and paper substrates. In addition, we provide numerous design and security options and effects.

The AFP Group has over 40 years of experience in converting native aluminium and plastic foils to high-quality final products: **we laminate, lacquer, extrude, print, slit, emboss, punch and form aluminium and plastics to sophisticated flexible packaging.**

4. FINISHING

We deliver **final products in different formats**: lids, reels, containers, capsules, bags, pouches, sachets, etc.

5. QUALITY

Our laboratories, sophisticated processing, quality control and assurance equipment, and our stringent procedures ensure the **highest possible quality** and stability as well as the reliability of our supplies.

Certificates performed by leading auditing institutions

Aluflexpack Group is a proud member of Sedex Members Ethical Trade Audit (SMETA) which confirms our responsible and transparent business practice in Labour, Health and Safety, Environment and Business Ethics norms.

Aluflexpack is a proud holder of Gold EcoVadis medal.

Cooperations and sustainability initiatives

Using the **Aluminium** sourced responsibly
ASI Performance Standard – plant Drniš 10/2021
ASI Chain of Custody Certificate – plant Einsiedeln, 10/2021

The mark of responsible forestry
 FSC® A000504

Using the **paper and cardboard** sourced responsibly
 FSC Certificate has been issued to AFP plant Umag

Main interest is to integrate the flexible packaging in **circuar economy**
Member since January 2019

Delaminating aluminium-based multilayer foils and returning them to the production stream for non-food applications
Cooperation started in 2021!

Production that meets / will meet all the conditions of the Interseroh material **recyclability test**

Proving the technical viability of digital watermarks for **accurate sorting of packaging waste** and the **economic viability of the business case** at large scale.
Aluflexpack is a member since November 2021!

Trade organization promoting the fruit and vegetable products, cooperating with packaging producers, scientific institutes and other organizations to increase the sustainability of the products
Member since 04/2022!

Production that meets all the conditions for 4 areas – **Environment, Labour and Human rights that include work environment, Ethics and Sustainable procurement.**
In 2022 Aluflexpack won the Ecovadis Golden Medal!
