

Navigating Pharma industry complexities:

Learn how system thinking can transform packaging sustainability

Insights from Agnieszka van Batavia, VP
Pharma Sustainability at Constantia
Flexibles in Packaging Suppliers Global
| Issue Two 2025

Tackle complex challenges head-on

Address legal requirements, GHG emissions targets, and technical performance demands with innovative strategies that drive progress.

Embrace system thinking for innovation

*Adopt a comprehensive approach
that examines lifecycle
interconnections, fostering
sustainable innovation and
resilience.*

Implement Lifecycle Assessment (LCA)

Quantify environmental impacts and design efficient resource management strategies to enhance sustainability and reduce waste.

Innovate for effective material recovery

*Develop mono-material packaging
and advanced recycling
technologies to overcome recovery
challenges and improve
environmental outcomes.*

Future-proof Pharma packaging solutions

Create adaptable, compliant, and high-performing solutions that meet regulatory and sustainability goals, ensuring long-term success.
