Barrier ∞ Packaging Solutions

The Challenge:

Finding the ideal packaging solution that will maximize the stability of your formulation, while ensuring cost-effectiveness and sustainability.

LOG is a market leader in developing and manufacturing pharmaceutical primary packaging solutions designed to protect solid-based formulations from exposure to oxygen and/or moisture.

Leveraging LOG's know-how in Barrier Packaging, using innovative Pharma grade polymers and unique technologies, LOG is introducing the Barrier ECO line – the latest addition to our world-leading range of passive barrier packaging solutions.

LOG's Barrier ECO line:

OxyBlock[®]
eco

Reduces oxygen permeation

MonoBlock[®]
eco

Reduces moisture permeation

POWERED BY

MultiBlock[®]
eco

Reduces oxygen & moisture permeation

POWERED BY

- High barrier performance
- Cost Effective
- Minimal weight and material usage
- Extend drug shelf life
- Minimize the need for drop-ins
- Passive protection
- Meet standard bottle design

Powered by 

A unique Pharma grade HDPE resin with superior gas barrier properties allowing to reduce bottle weight by up to 30% without compromising on WVTR (Water Vapor Transmission Rate).
